**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Todd Buck on November 15, 2011.

In the Claims of 9/13/2011:

In claim 23,

23 (currently amended). A method of increasing tissue volume in a subject, said method comprising injecting a composition, said composition comprising microparticles of cross-linked alginate, wherein said microparticles of alginate are fully crosslinked with a divalent or polyvalent cation, wherein said alginate, prior to said crosslinking, has a molecular weight of between about 100kDa and about 1200kDa and is present in solution at a concentration of from 0.4% to 1 % (w/v), and wherein the injection of the composition increases the tissue volume after injection.

In claims 43 and 47, line 1, the terms 'claim 42' has been changed to 'claim 23'.

Claims 42, 44, 45 and 46 have been cancelled.

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The closest prior art Marler et al teach injection of a 2% calcium alginate solution which maintains a volume of 88% over eight weeks. This is with respect to its construct crosslinked after injection. Marler further teaches that the pre-gelled alginate injection retains only about 30% of its volume eight weeks post injection. This teaching of Marler

deters one of ordinary skill in the art from injecting the fully crosslinked alginate for increasing tissue volume. The instant invention (see Examiner's amendment to claim 23 above) uses a crosslinked alginate (crosslinked before injection) solution in a concentration range of 0.4% to 1% w/v and having a specific molecular weight range for increasing tissue volume. The teachings of Marler in view of the secondary references do not render obvious the instant claims.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ganapathy Krishnan whose telephone number is 571-272-0654. The examiner can normally be reached on 9.00am-5pm; Mon-Fri. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia A. Jiang can be reached on 571-272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
